

The two known Ario/Uigi pairs are dressed in complementary colors.

This implies the existence of a third pair that wears blue and orange.

Little is known about the properties of this proposed 3ario and 3uigi.

AT OUR WEATHER, WE TURN
TO CHANNEL 6 METEOROLOGIST,
GARY DAID.

THANKS, GREG.
I'M AFRAID THERE'S
BEEN A MIX-UP...

METEOROLOGIST;
I'M A MEATY
UROLOGIST.

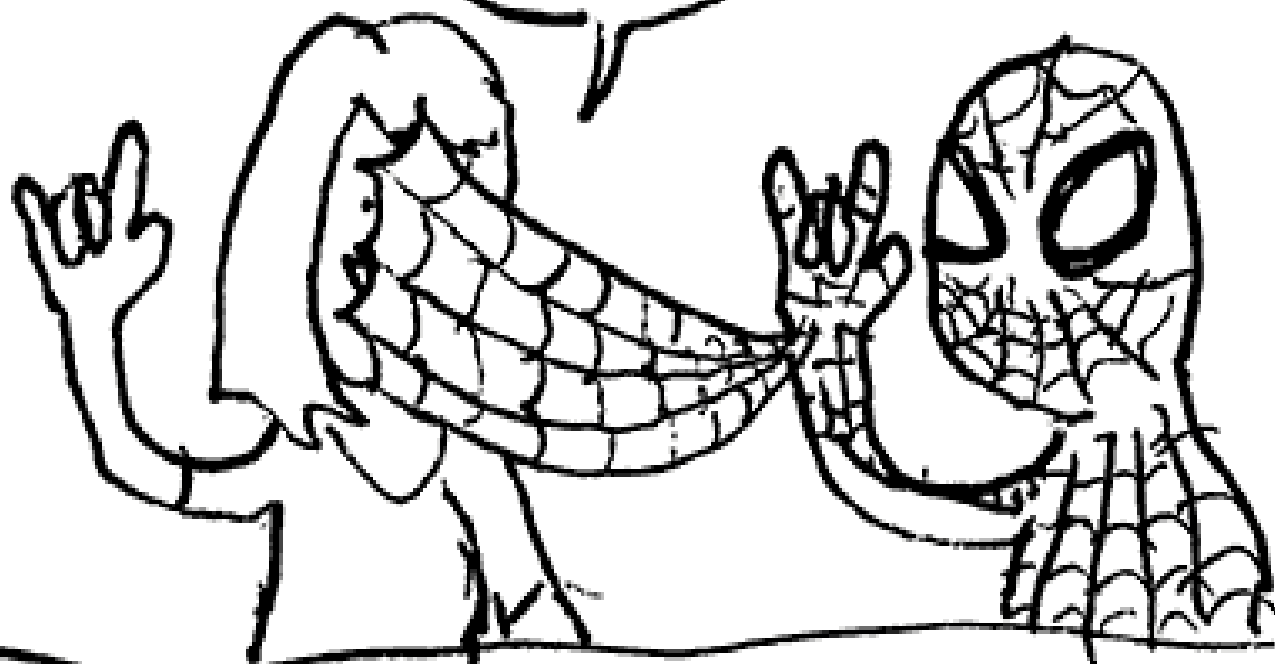

I DON'T KNOW
WHAT ANY OF THESE
SYMBOLS MEAN.

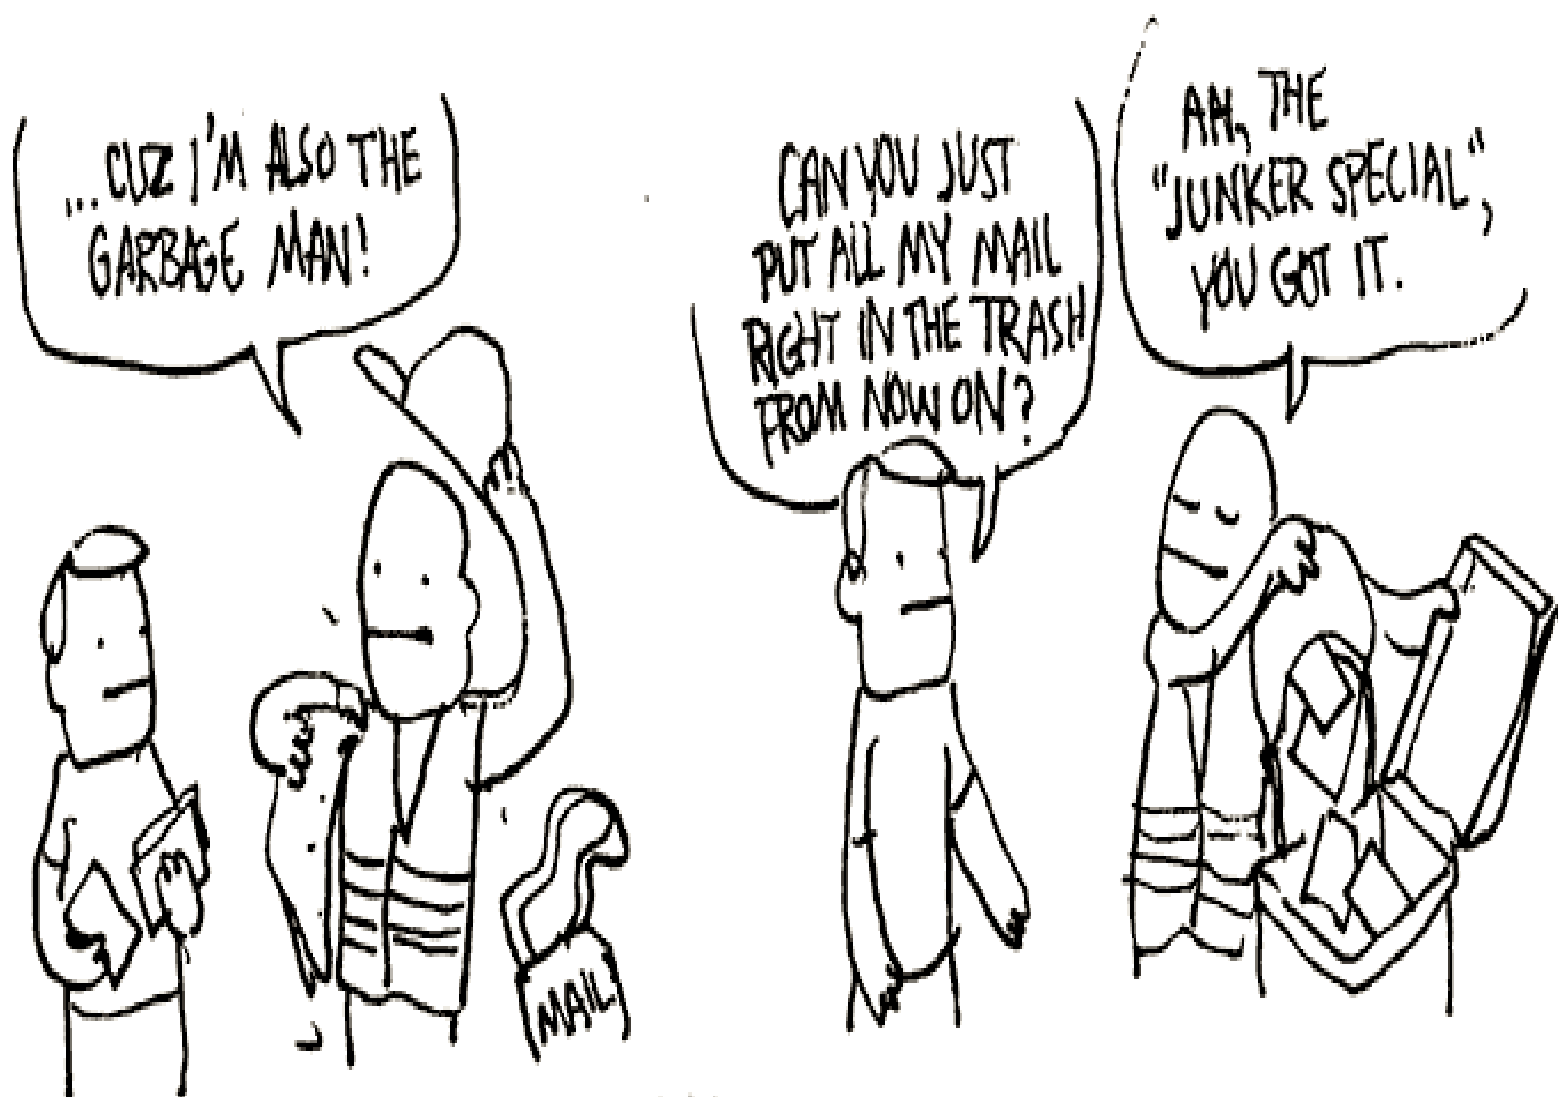

AND THIS IS THE SIGN
FOR "I LOVE YOU." CAN
YOU TRY THAT?

GREAT
JOB.

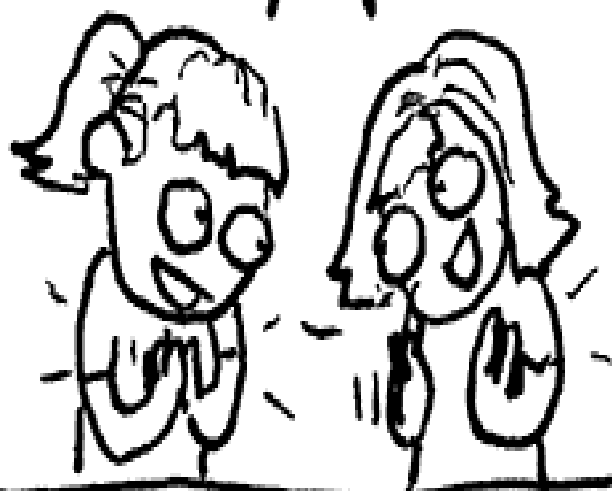

EXIT LIGHT

...EXCEPT FEBRUARY, WHICH HAS
28, UNLESS IT'S A LEAP YEAR
(WHICH IS ANY YEAR THAT'S
DIVISIBLE BY 4, BUT NOT BY
100, UNLESS IT'S ALSO DIVISI-
BLE BY 400), IN WHICH CASE
